

## TESTIMONIAL - Partner Training

### Thrive for continuous availability

Renew, a major independent power producer in India, provides end-to-end solutions in the areas of clean energy, green hydrogen, value-added energy offerings through digitalization, storage, and carbon markets that increasingly are integral to addressing climate change. With a clean energy portfolio of approximately 13.7 GW – including 6.4 GW of wind power - Renew is a leading decarbonization player on the market and always looking into ways to improve business and fasten the road to a sustainable future.

As a Thrive partner, Renew experiences close and flexible support while strengthening their independence. *“When our team followed a partner training our needs were first analyzed. We felt our company should be able to work more efficient with our own staff,”* says Rajkumar M., Wind Engineering Manager. *“The training gave our team the chance to learn from experts and receive certificates to do our own gearbox and endoscope inspections. Now, we can do our own interventions and analytics. Moreover, we are also able to act in a preventive way to optimize the gearbox performance and maximize the turbine output.”*
